PROFILE

Results-driven Back-End Developer with 5+ years of experience building scalable, efficient web applications using PHP, Symfony, and modern development tools. Proven ability to collaborate in Agile environments, deliver high-impact solutions, and mentor team members. Passionate about clean code, automation, and system optimization.

PROFESSIONAL EXPERIENCE

Full Stack PHP Developer, *Inchcape Digital Delivery Center*

06/2021 – 07/2025

Pasig, Metro Manila, Philippines (Remote)

- Developed scalable applications using Symfony, optimizing internal workflows for product teams.
- Collaborated in SCRUM teams, contributing to improved delivery timelines and website performance through iterative development and optimization.
- Implemented RESTful APIs with GraphQL and Libsonnet and maintained robust testing pipelines using Postman and Behat.
- Conducted code reviews and provided mentorship to junior developers, fostering knowledge sharing and adherence to best practices in coding standards.
- Collaborated with DevOps teams during deployments and cutover activities, supporting production releases by monitoring Kubernetes pods and application logs to ensure smooth rollouts.

Full Stack Web Developer, *FirstCom Solutions PTE Ltd.*

12/2020 – 06/2021 | Remote

- Engineered custom CMS platforms tailored to client needs, improving usability and content management workflows.
- Maintained client websites built on WordPress and implemented feature updates and bug fixes.
- Partnered with project managers to refine project scope, clarify requirements, and support efficient delivery.

System Programmer, *AFreight Philippines Inc.*

08/2019 – 12/2020

Tanauan, Province Of Batangas,
Philippines

- Built secure web applications for internal use, applying common security best practices and performance optimizations.
- Delivered custom CMS tools that supported business operations and internal data workflows.
- Used Git-based version control to track code changes, maintain development history, and support team collaboration.
